Cure Date and Shelf Life of MT-Propeller O-Rings

Affected Propellers: All hydraulic and electronic constant speed MT-Propellers.

Description: MT-Propeller O-rings for standard propellers type C-()-() have a shelf life of 5 years after manufacture.

After 5 years storage, a visual inspection must be performed.

In case of a positive result the shelf life of the O-rings can be extended by another 2 years to a total shelf life since manufacturing of 7 years.

To reach the above listed shelf life the O-rings must be stored in an industrial atmosphere at a temperature between +5°C up to +28°C (+41°F up to +82°F) and a relative humidity between 30%-70%.

Additionally the O-rings must be stored protected from light, oxygen, ozone etc. according to DIN 7716.
