Advantages

- Best vibration damping characteristics for almost vibration free propeller operations!
- Bonded on wide chord nickel alloy leading edges for superior erosion protection of the blades!
- No propeller ADs!
- TBO 4500 hours or 6 years, whatever comes first, for low maintenance costs!
- No intermediate inspections on an agriculture installation!
- No intermediate inspections are needed between the TBO which requires the propeller removal!
- Reduced cost for spare parts, like blades and lower overhaul costs, for the complete propeller assembly!
- No rpm restriction for the complete operational range!
- No life limitation and repairable in case of an FOD.
